

KANHAIYA KUMAR

Java Backend Developer

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Java Backend Developer with 3.6+ years of experience building scalable backend systems using Java 21, Spring Boot, REST APIs, and Microservices. Experienced in designing production-grade applications using Hexagonal Architecture and developing AI-powered recruitment solutions with Google Gemini LLM, embeddings, and PostgreSQL pgvector. Strong expertise in API development, third-party integrations, CI/CD, and Data Structures & Algorithms (500+ problems solved).

TECHNICAL SKILLS

Languages & Core CS: Java (Java 21), SQL, OOP, Collections, Data Structures & Algorithms

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate

Databases: MySQL, PostgreSQL, pgvector

Backend & Architecture: RESTful APIs, Microservices, API Design, Webhooks, Hexagonal Architecture, System Design, Swagger

AI & Search: LLM Integration (Google Gemini), Embeddings, Semantic Vector Search (pgvector)

Third-Party Integrations: Meta WhatsApp Cloud API, Razorpay, MSG91, Twilio

Cloud, DevOps & Testing: AWS, Docker, Gradle, Git, GitHub Actions, CI/CD, Sentry, Jira, JUnit, Mockito, Postman

EXPERIENCE

Backend Developer – Product Development

July 2025 – Present

Duru Cooperation

Bengaluru, India

Product: Duruper – Global Recruitment Platform

Tech Stack: Java 21 | Spring Boot | RESTful APIs | LLM Integration | pgvector | Embeddings

- Architected and delivered an AI-powered CV Parsing system using Apache Tika and Google Gemini 2.5 Flash LLM, implementing rate limiting for secure and scalable API consumption and reducing manual resume processing time by 80%.
- Developed an AI-driven candidate fitness scoring system generating 0–100 job-fit scores using Gemini LLM, enabling recruiters to quickly rank and filter applicants.
- Built an AI-powered job classification engine using Gemini embeddings and PostgreSQL pgvector to automatically suggest Job Function and Industry through semantic vector search.
- Built an end-to-end WhatsApp recruitment platform using Meta WhatsApp Cloud API, enabling candidate sign-up, job applications, and Razorpay membership purchases through a webhook-driven conversation engine and TRAI/DLT-compliant SMS consent workflow.
- Improved CI/CD pipeline performance by removing redundant Gradle builds from Docker images and implementing Gradle dependency caching in GitHub Actions, reducing deployment time by ~40% (18 → 11 minutes) and lowering infrastructure costs.
- Design and maintain scalable RESTful APIs following Hexagonal Architecture (Ports & Adapters), optimizing backend performance and reliability for frontend and third-party integrations.
- Own features end-to-end in an Agile (Jira) environment — from API design and Swagger documentation to production monitoring and error resolution with Sentry — collaborating with product, design, frontend, and QA teams.

Software Engineer

May 2022 – Nov 2024

Cognizant Technology Solutions

Bengaluru, India

Tech Stack: Java | Spring Boot | Microservices | RESTful APIs | JUnit | Hibernate | MySQL

- Developed and enhanced backend microservices and RESTful APIs using Java and Spring Boot for enterprise client applications, improving application response times by 10%.
- Designed and optimized database operations using Spring Data JPA, Hibernate, and MySQL, improving query performance by 15%.
- Built REST APIs with robust validation, exception handling, and clean API design, enabling seamless integration with frontend applications and downstream systems.
- Implemented comprehensive unit and integration tests with JUnit and Mockito, achieving 90%+ test coverage, and validated APIs via Postman to catch performance bottlenecks before release.
- Investigated and resolved high-priority production issues, collaborating with cross-functional teams across the SDLC in an Agile environment.

EDUCATION

Visvesvaraya Technological University
Bachelor of Engineering in Electronics and Communication Engineering

Bengaluru, India
Aug 2017 – Aug 2021

PROJECTS

WhatsApp Recruitment Integration — Conversational Hiring Funnel

Tech Stack: Java 21 | Spring Boot | Meta WhatsApp Cloud API | Razorpay | PostgreSQL | MSG91 | Twilio

- Designed **Razorpay payment callbacks with isolated transaction boundaries**, ensuring downstream side-effect failures never roll back a confirmed payment.
- Implemented **consent-first messaging** using **MSG91/Twilio** with one-time tokens, ensuring compliance with **Meta opt-in policies** and **TRAI/DLT regulations**.
- Engineered a webhook-driven **10-state conversation engine** handling **Meta template and interactive button events**, with per-candidate state persisted across the flow.
- Ensured **webhook reliability** with **Sentry-backed error reporting** and guaranteed acknowledgments to Meta, preventing retry storms.
- Developed recruiter dashboard APIs for invitation tracking, conversion analytics (sign-up/apply/pay funnel), advanced filtering, and scheduled no-response automation.

AI-Powered CV Parsing System

Tech Stack: Java 21 | Spring Boot | REST APIs | PostgreSQL | Apache Tika | Gemini 2.5 Flash LLM

- Built a resume parsing engine using **Java 21, Spring Boot, and Hexagonal Architecture**, with a **port-based LLM integration** that allows swapping Gemini for any other LLM provider without code changes.
- Automated extraction of structured resume data from **multiple document formats (PDF, DOCX, DOC)** via **Apache Tika**, enabling **one-click candidate profile creation** with transactional auto-save.
- Implemented **schema-driven prompt engineering** with explicit JSON output contracts and date normalization rules, ensuring consistent extraction across **seven resume sections**.
- Added **defensive handling for malformed LLM responses**, automatically computing candidate work experience and employment status from parsed data.

CERTIFICATIONS & ACHIEVEMENTS

- [Microsoft Certified: Azure Fundamentals](#)
- [Generative AI Fundamentals](#)
- [Claude 101 — Anthropic](#)
- Selected to conduct **technical interviews** for Java Backend roles, evaluating candidates on Java, Spring Boot, REST APIs, and problem-solving skills.
- Solved 500+ **DSA** problems across [LeetCode](#) and [GeeksforGeeks](#).
